FPT Aptech

2021-2023

IT - Information Technology

Ton Duc Thang University

2018 - 2022

B.A. in Business Administration

AWARDS & CERTIFICATIONS

- TOEIC: 890/990

PROFILE

Goal-oriented Junior Developer skilled in Java Spring Boot, .NET, and Entity Framework. Dedicated to delivering high-quality software solutions and solving real-world challenges. Collaborative team player focused on continuous learning and staying up-to-date with industry trends.

WORK EXPERIENCE

Software Developer

ROZITEK INTRALOGISTIC SOLUTION CO., LTD

Jan 2023 - Present

- Collaborated closely with outsourced teams to ensure smooth project coordination
- Developed a new module for the ERP system, focusing on backend development using Java Spring Boot to enhance functionality.
- Implemented an innovative approach to assign and manage permissions within the system, improving user access control and security.
- Integrated the backend with the frontend using React and TypeScript, creating a seamless user experience.
- Followed Git flow methodology for version control, enabling effective collaboration and code management.
- Actively participated in Agile development processes, including sprint planning and daily stand-ups, ensuring timely delivery of features.
- Demonstrated proficiency in CI/CD processes, facilitating efficient software delivery and continuous integration.
- Utilized AWS S3 for scalable data storage, ensuring reliable and secure handling of application data.
- Developed APIs in .NET to integrate with an AMR (Autonomous Mobile Robot) system, enabling seamless communication and control between the backend system and the robot.

Software Developer Intern

APOLLO ENGLISH

Jun 2022 - December 2022

- - Managed and maintained the system, resolving bugs, implementing modifications, and introducing innovative features.
- - Developed robust applications using AngularJS, Angular, ReactJS, and .Net frameworks.
- - Leveraged Postgresql database for optimized user experiences.
- - Spearheaded CI/CD pipeline implementation for efficient software delivery.
- Built a new report module to enhance reporting capabilities.
